# Barbecue grill UNO

is a multifunctional grill  
with an impeccable aesthetics

**UNO** is a modern round grill with a frying surface. A practical culinary tool enclosed in an elegant body, made of high-quality materials using modern technologies.

**UNO** easily transforms from a barbecue to a brazier for skewers, a hearth for a pot or a fire bowl. And with a wooden table installed, **UNO** can be turned into a complete dining area.

# UNO is an atmosphere creator and an indispensable culinary assistant

# UNO Grill Structure

# Two models — two philosophies

**UNO** Portable compact grill

**UNO+** Stationary high grill

UNO PRODUCTS

# UNO

A compact barbecue grill designed for cooking while sitting around the hearth. Easily transforms into a fire bowl. Can be supplied with two cases for convenient transportation.

## Atmosphere Creator

**UNO**'s main goal is to create warmth and coziness. Open fire, its magic, attracts others, and **UNO** just enhances the beauty of the flame, enclosing it in a flawless form.

# UNO Features

A classic model of a round barbecue, combining many functions. A capacious firebox, installed on top of a sealed ash collector, forms a fire bowl. With the help of the special removable handles, the frying surface can be installed and removed even when it is heated. UNO can be easily carried in two special cases and placed in a car trunk.

# Characteristics

Grill height (with the frying surface installed)	45 cm
Frying surface outer diameter	60 cm
Grill body material	Steel
Frying surface material	Carbon steel
Frying surface coating	Multilayer organic coating
Grill weight	20 kg

UNO PRODUCTS

# UNO+

A stationary large barbecue grill 70 cm high. Designed for cooking while standing around the hearth. Supplemented by the accessories and a round wooden table, **UNO+** turns into a real professional kitchen or dining area for four people.

## A Culinary Tool

The cooking process at **UNO** is so simple and fun that everyone around wants to take part. As soon as the fire in the UNO firebox lights up, the grill instantly becomes the center of attraction, inviting all guests to plunge into the culinary process.

## UNO+ Features

An enlarged model of the **UNO** round grill. Designed for permanent installation. Differs in the increased height and a large frying surface. Allows cooking food comfortably for eight people at the same time. UNO+ with a wooden table installed turns into a full-fledged dining area.

## Characteristics

Grill height (with the frying surface installed)	70 cm
Frying surface outer diameter	70 cm
Grill body material	Steel
Frying surface material	Carbon steel
Frying surface coating	Multilayer organic coating
Grill weight	26 kg

# UNO Surface and Body Coating

- The body of the grill can be coated with **black** heat-resistant silicone paint or can be artificially **rusted**.

The artificial rusting of the body gives it a beautiful red color and provides the highest utility. Such a grill is completely weatherproof and will not change its appearance for many years.

- The **frying surface** is coated with a multi-layer organic polymer coating with non-stick properties. This coating is a mixture of natural oils polymerized in high-temperature ovens.

UNO ACCESSORIES

# UNO Table

A removable round table for the **UNO+** barbecue grill. Serves as an auxiliary work surface while cooking on a barbecue grill and can be used as a full-fledged dining area.

# UNO Table Features

The table consists of four massive maple countertops, interconnected by steel brackets with special reinforcement. A five-layer polymer protective layer of varnish is applied to the surface of the wooden elements.

## Characteristics

Thickness	2,1 cm
Outer diameter	110 cm
Material	Maple impregnated with water-repellent varnish

**UNO** ACCESSORIES

# UNO Grill

A grill grate installed in the center of the frying surface without occupying its usable area. Allows cooking food directly over an open fire or coals.

## Characteristics

Thickness	6 mm
Diameter	25 cm
Material	Coated carbon steel

**UNO** ACCESSORIES

# UNO Kazan

Rings for a pot installation, fasten in the center of a frying surface, without occupying its useful area. Allows placing a kettle or a pot in the center of the hearth, in the place of the highest heat concentration.

## Characteristics

Thickness	6 mm
